Chilled Filtered Water that Tastes as Pure as it Should

Zip Filtered Water - a Healthy Alternative

Zip chilled, filtered water systems are a healthy alternative to bottled water at a fraction of the cost so you can enjoy cool refreshing drinks without having to worry about constantly having to deal with bulky water bottles or waste valuable space for bottle storage.

Chilled Filtered Water that Tastes as Pure as it Should

Every Zip chilled water system comes with a choice of five or sub micron carbon filters.

Zip five micron carbon filters reduce dirt, rust, asbestos fibres and other particulates such as oxydised iron, manganese and sulfides that can contaminate drinking water. They also eliminate offensive odours by reducing chlorine and other chemicals.

Zip sub-micron carbon filters also reduce parasitic protozoan cysts such as giardia, entamoeba and cryptosporidium.

The result is fresher, better-tasting drinking water.

Zip Filtered Water is Safer too

With Zip chilled filtered water systems you'll no longer run the risk of back injury caused by lugging around, storing and installing heavy water bottles. In fact you'll never have to change a bottle again.

All Zip systems are equipped with a pressure surge protection system designed to protect delicate filter cartridges from pressure surges occurring in water mains. This is an important safety feature as surge-damaged filter cartridges may leak or fail to continue filtering as intended.

Warranty

Zip chilled water systems come with a 12 month parts and labour warranty.

Under-sink Systems

Zip HydroTap

When it comes to dispensing chilled filtered water, Zip HydroTap is the ultimate in convenience and style. The elegant and compact design is totally in keeping with the modern environment. It can be installed either at a sink or on a work top with the optional Tap Font which houses an integral drain (shown). The chilling system fits easily under the bench top.

The system's ergonomic design makes it easy to use. The actuating lever can either be pressed down for dispensing chilled water to glasses or lifted up into the locked position to fill larger containers.

Zip HydroTap has the capacity to deliver up to 34 glasses of chilled, filtered water at one time and up to 175 glasses in one hour.

Replacement cartridges are designed to make filter changing quick and hygienic and with a bayonet fitting they are as easy to change as a light globe.

Zip Chill Tap

Zip Chill Tap is the easy way to have chilled water on tap whenever you need it.

The stylish, unobtrusive tap is located at the sink whilst the chiller unit remains out of sight beneath the sink.

It comes with a choice of five- or sub-micron filters and in two sizes providing up to 140 glasses of chilled, filtered water in an hour.

Zip Filter Tap

Where chilled water is not required, the Zip Filter Tap offers the alternative of filtered water at ambient temperature only. The filter is easily installed in the cupboard under the sink and there is no requirement for an under-sink unit.

It comes with a choice of five- or sub-micron filters.

Free Standing Systems

Zip free-standing chilled filtered water systems are ideal for public areas in virtually any location. Hospitals, clinics, reception areas, schools, factories and site sheds are just a few of the places where they provide healthy refreshing drinks.

And compared with bottled water Zip systems deliver chilled filtered water at a fraction of the price of bottled water. The following table compares the costs.

Cost Comparison of Bottled Water vs Zip Chilled Water over 5 years

- ◆ Bottled Water (75L/week @ \$11.40 per bottle + rental)
- Bottled Water (30L/week @ \$11.40 per bottle + rental)
- ▲ Zip Chill Master (28L/hour and filter change every 6 months)

Zip Chillmaster

Zip Chillmaster is a free-standing chiller that comes with a choice of five- or sub-micron filters. It is equipped with a carafe filler and bubbler.

With its robust, easy-to-clean stainless steel bowl and case, Zip Chillmaster delivers 140 glasses of chilled, filtered water per hour. A filter change reminder light indicates when filter replacement is due.

The standard Zip Chillmaster is a floor-mounted model.

As an option it is also available in a wall-mounted version.

For installations where the system is not plumbed to drainage, it can be fitted with a waste water dish.

A disposable cup system that can be fitted to the unit is available as an optional accessory.

Zip Economaster

Zip Economaster is the ideal budget-priced chilled water solution for factories, work sites, site sheds and temporary accommodation. Two models are available delivering 60 or 140 glasses of chilled water per hour.

It is equipped with a bubbler and a carafe filler is available as an optional extra.

The chilling unit is housed in a white powder-coated steel case. The unit can be fitted with a stainless steel case as an option.

The standard Economaster comes unfiltered with an option for a five micron externally mounted filter.

For installations where the system is not plumbed to drainage, it can be fitted with a waste water dish.

A disposable cup system that can be fitted to the unit is available as an optional accessory.

Zip Economaster

Wall Mounted Systems

Zip wall mounted and recessed systems are the ideal solution for providing chilled filtered water in busy public or private areas.

Zip Chill Fountain

Zip Chill Fountain is the most versatile chiller around for public areas in locations such as airports, colleges and hospitals.

It comes in a wide variety of single or twin bowl configurations to suit adults, children or wheelchair users and delivers 140 glasses of chilled filtered water per hour.

The system is AS1428 approved. It is equipped with deep stainless steel bowls and the robust easy-to-use bump-action electronic controls are designed for use by people with physical disabilities.

The Chill Fountain comes with a choice of five- or sub-micron filters which are housed out of site with the chilling unit behind secure lockable stainless steel access panels. A filter change reminder light indicates when filter replacement is due.

Zip Wall Fountain

Zip Wall Fountain is a recessed chilled water system designed to save space and is ideal for installation in busy corridors.

It is equipped with a bubbler and carafe filler, dispenses 140 glasses of chilled filtered water per hour and comes with a choice of five- or sub-micron filters. A filter change reminder light indicates when filter replacement is due.

The chilling and filtration unit is housed behind a secure stainless steel lockable access panel.
